

Lyft Backend-Engineering

Steps to follow

- Step 1: Login on forage.com with proper details. first of all, you need to register on-site which will take some info. you may choose to not give the info.
- Step 2: Visit the below link or search for the Lyft backend virtual program on the homepage.
- <https://www.theforge.com/virtual-experience/xSw9echtixLAoPdsH/lyft/lyft-back-end-engineering-virtual-experience-program?ref=Bh6z6EWHF2Rrx4uh3>
- Step 3: Register yourself for the program. It will ask for a few details. answer them and you are registered successfully.
- Step 4: Follow the steps. In Step 3 you need to upload your work and the folder for the same is attached in the zip you are in currently. And task 1 is done.
- Step 5: Task two attempt some quiz four questions max. answer for the most question is all of these. Upload your zip folder on GitHub and paste the repo link after that. Task 2 is done.
- Step 6: Task 3 Click next attempt the quiz and submit the same repo link. It has all the code.
- Step 7: Task 4 . Submit you repo link again. And you are done. Give review and download certificate. The sample is attached in the zip.
